

OMEGA TYPE LTB-852 Computer Logic Training Board on 1024 X 1 Bit Static Random Access Memory (2102) has been designed specifically to get the familiarization of the operation of static MOS memory. The unit is self contained and provide the understanding of Read, Write and Chip Enable operation with the help of switches and LEDs. Dynamic operation of the chip can also be understood by connecting the pulse generator at the appropriate terminal.

Practical experience on this board carries great educative value for Science and Engineering Students.

OBJECT

To study Operation of a 1024 X 1 Bit Static Random Access Memory (2102).

FEATURES

The board consists of the following built-in parts :

- 01 + 5V D.C. at 50mA, IC regulated power supply internally connected.
- 02 Switches to set the memory data and address.
- 03 LEDs for visual indication of output data (read out).
- 04 Logic indication terminal provided to check the logic state of various pins of IC.
- 05 Adequate no. of other Electronic Components.
- 06 Mains ON/OFF switch, Fuse and Jewel light.
- 07 The unit is operative on 230V $\pm 10\%$ at 50Hz A.C. Mains.
- 08 Adequate nos. of patch cords stackable from rear both ends 4mm spring loaded plug, length 50cm.
- 09 Good Quality, reliable terminal/sockets are provided at appropriate places on panel for connections / observation of waveforms.
- 10 Strongly supported by detailed Operating Instructions, giving details of Object, Theory, Design procedures, Report Suggestions and Book References.
- 11 Weight : 1.700 Kg. (Approx).
- 12 Dimension : W 340 x H125 x D 210

OTHER APPARATUS REQUIRED :

- 01 Pulse Generator OMEGA TYPE PG-312: 2 nos. (Optional to understand the memory operation in dynamic mode).

We are committed to the continuous development of our products, and therefore reserve the right to amend specifications without prior notice.

OMEGA ELECTRONICS
